Introducing the NEW Mapleson ANESTHESIA CIRCUITS with "In-Line" Manometer & Pressure Relief Valve

The New "In-Line" Mapleson will help facilitate ventilation of patients and provide the following Features and Benefits:

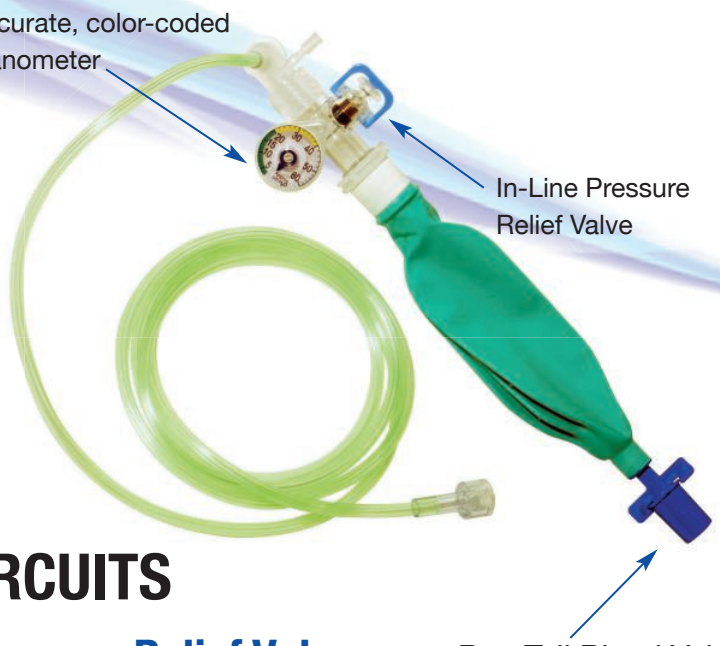

FEATURES:	BENEFITS:
· Built-in, accurate, disposable, color-coded manometer* with gradient markings	· Offers convenient viewing of airway pressure (PIP & PEEP).
· Bag Tail Bleed Valve	· Simple and easy-to-use. Reduces adjustments from handling the bag.
· In-line Pressure Relief Valve (40 cm H_2O +/- 5 cm H_2O)	· Can be easily over-ridden when necessary.
· Compact Design	· Color-Coded Manometer* and Pop-Off are integrated for compact ease-of-use in any clinical setting.

*Accuracy is +/- 3 cm H_2O between 0 - 15 cm H_2O and +/- 5 cm H_2O above 15 cm H_2O.

10-80388	1/2 Liter Mapleson Bag, In-Line Pop-Off, Manometer, O_2 Tubing, Tail Bleed	20/Box
10-80389	1 Liter Mapleson Bag, In-Line Pop-Off, Manometer, O_2 Tubing, Tail Bleed	20/Box
10-80390	2 Liter Mapleson Bag, In-Line Pop-Off, Manometer, O_2 Tubing, Tail Bleed	20/Box

A testimonial regarding the New "In-Line" Mapleson Anesthesia Circuits:

"I have already talked with many hospitals who like the new design and are going to switch. The idea behind the design is ultimately to deliver better, safer care to patients!

Patients will get the benefit of this new design."

Hank Perry RCP, RRT
Respiratory Clinical Coordinator, NICU
Community Regional Medical Center
Fresno, California
