

MaxFLO₂ Air/Oxygen Mixer

- Flow and FiO₂ control all in one
- Mixed gas port for intermittent or continuous monitoring of O₂ concentration
- Low Flow Model: (0-10 LPM)
Delivers 0-10 LPM of air, oxygen or a combination of both
- High Flow Model: (0-50 LPM)
Delivers 0-50 LPM of air, oxygen or a combination of both
- Pole mount included for easy transport or storage
- Quiet operation for minimal patient stimulation
- 24-month warranty

Mixing Air & Oxygen made simple, quick and affordable!

The all-new MaxFLO₂ from Maxtec is an affordable method of mixing and monitoring air and oxygen. The MaxFLO₂ is available in two models, a High Flow (0-50 LPM) and a Low Flow (0-10 LPM). Each unit comes equipped with dual flowmeters and a mixed gas analysis port for intermittent or continuous monitoring of FiO₂. Gas ratios are visibly identified on the face of the unit to allow for fast, accurate flow settings.
