

Curaplex® CuraBronch Elite™

Single-Use Bronchoscopes

Empowering clinical decisions
with clarity and control

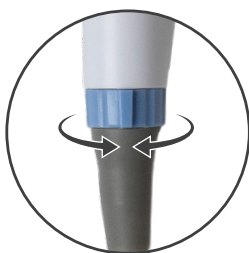

Why Choose Curaplex® CuraBronch Elite™

CuraBronch Elite™ delivers high-definition imaging, precise control, and versatility to support caregivers in dynamic clinical environments.

Capture Photo and Video on Handle

Still images and video at the point of care, reducing the need to use monitor screen.

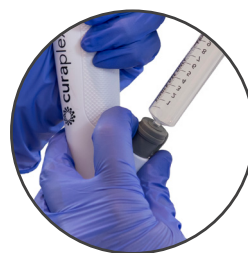

180° Scope Rotation Knob

Reduces the need to maneuver hand/arm position while holding the scope.

Swivel Suction Connector

Adjust the direction/position of suction tubing based on the user's unique setup.

Biopsy Valve

Standard offering with both slip tip and luer lock syringe connections.

High-Definition Imaging

Wide field of view (120°), 720 x 720 camera chip resolution and an HD 1080p monitor screen.

Built to Support a Range of Bronchoscopy Procedures

Large Working Channel

Equal to or larger working channel across all three sizes compared to market-leading bronchoscopes of the same size.¹

Slim Insertion Tube Profile

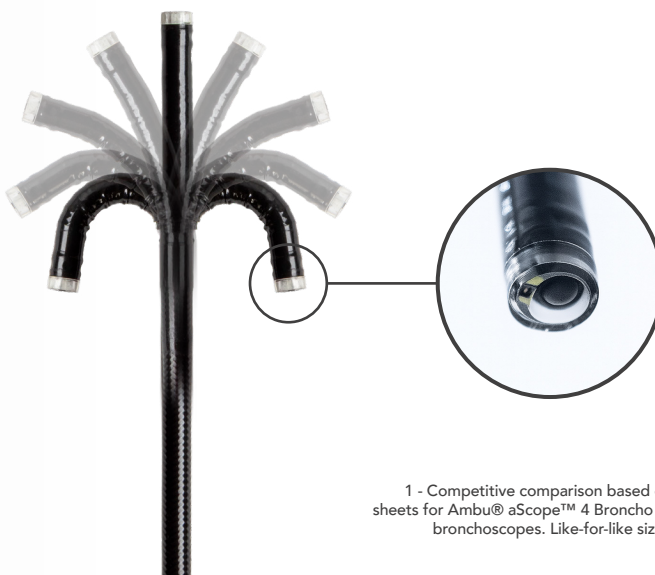

Equal to or smaller insertion tube and smaller distal tip outer diameter than market-leading bronchoscopes of the same size.¹

±180° Tip Flexion

Navigate complex anatomy precisely across all three sizes.

ET Tube Retainer

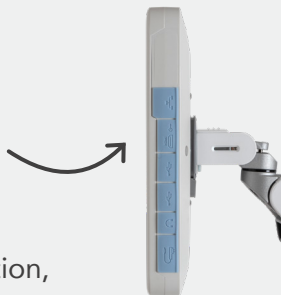

Built-in ET tube retainer for use during intubation, along with an Aintree Intubation Catheter retainer in the slim size bronchoscope.

1 - Competitive comparison based on publicly available technical data sheets for Ambu® aScope™ 4 Broncho and Verathon BFlex™ 2 single-use bronchoscopes. Like-for-like sizes compared (Slim/Regular/Large).

Full-HD Display for Real-Time Decision Support

- High definition 1080p resolution on a 14" screen with brightness, contrast, sharpness, and color controls
- Up to 5.5 hours of battery life on a single charge
- Connect to external monitor with the HDMI port, export data via USB (DICOM format supported)
- Can be mounted to workstation, universal VESA pole mount, or propped on tabletop with kickstand
